IMPORTANT! KEEP FOR FUTURE REFERENCE

WARNING! Any movement made by you or your child may affect your balance. Be vigilant at all times

WARNING! Be extra cautious when bending forward or leaning

WARNING! Never use the sling whilst bicycling, cooking, practicing a sport or in a car!

Read the safety guidelines and conditions of sale before use

- Check the clasp before first use
- Ensure the child can breathe freely
- Never wear the sling under a jacket
- Maximum carry weight 15kg
- Ensure the baby is not too hot or cold
- Ensure the baby's head does not bump against anything
- Check the sling for signs of wear on a regular basis
- Never use the last 10cm of the strap
- Never leave the baby unattended in the hammock

soft shoulder cushion

make sure that you always wear the cushion on your shoulder

The head should be as close as possible towards the **shoulder padding**. So as if it is positioned in the corner of the shoulder padding and the outside rail.

always use the patented safety construction

BANANA

± 0-4 mth

**XS / S / M
Baby**

**M / L / XL
Baby**

1

please sit down, place the sling on your lap

1

2

turn the front of the baby sling to the inside to make the 'pocket' smaller

3

4

lay baby diagonally in the sling

2

5

put your head, arm and shoulder through the strap

3

6

ensure the sling facing the stomach side is pulled up and the baby can breathe freely, keep the nose and the mouth free

4

KANGAROO

± 3+ mth

1

bottom first with feet up; Buddha-style

2

3

ensure sling fabric on the inside is also up high

4

baby's head can rest against the strap for support

HIPSTER

± 9+ mth

1

2

one leg on each side of you

3

Support the child with your hand, push it up a little and pull the strap

4

ensure the toddler's bottom is firmly in the sling
